

BAHA YILDIZ

JUNIOR SOFTWARE DEVELOPER

06baha06@gmail.com || 05436709764 || <https://github.com/06baha06> || My portfolio website

SUMMARY

Computer Engineering graduate with strong interest in frontend development, focusing on creating modern and functional user interfaces. Experienced in both frontend and backend development with knowledge of React, JavaScript, TypeScript, C#, and .NET framework. Proficient in database management using MySQL and PostgreSQL. Detail-oriented developer who values design and functionality equally, with strong problem-solving skills and collaborative team approach. Eager to learn and grow in software development.

EXPERIENCE

Aksoy Cozum/ Kocaeli - Software Development Intern 06/2023 - 07/2023

- Completed software development internship at Aksoy Cozum, located in Kocaeli University Technopark. Developed internal communication applications using C# programming language and EBA platform. Gained hands-on experience in form-based application development and enterprise software solutions.

Destek Bilgisayar / Istanbul - Hardware Support Intern 07/2024 - 08/2024

- Completed hardware internship at Destek Bilgisayar. Gained comprehensive knowledge of computer hardware components, system functionalities, and troubleshooting procedures. Developed understanding of hardware-software integration and technical support processes.

PROJECTS

OPTURK is a web-based optical form design and reading platform - Frontend Developer (2025)

- Served as frontend developer in team-based project. Developed website design and JavaScript functionalities using React framework. Collaborated with backend team and gained experience with Node.js and MongoDB technologies.

Mobile-Based Test Result Application for Doctors - Full Stack Developer (2024)

- Developed mobile application using React Native, Android Studio, and Firebase to assist healthcare professionals in analyzing test results. Created user-friendly interface for determining appropriate result ranges, improving examination efficiency and patient consultation workflow.

Web-Based Hospital Appointment System - Full Stack Developer (2024)

- Developed web-based hospital appointment system using .NET framework with role-based authentication. Implemented separate user interfaces for doctors and patients. Created scheduling functionality allowing doctors to set availability and patients to book appointments through the platform.

Car Wash Management System - Full Stack Developer (2023)

- Developed C# desktop application with PostgreSQL database for car wash business management. Created system for inventory management, vehicle tracking, invoice generation, and customer operations

EDUCATION

SAKARYA UNIVERSITY 2021-2025

SKILLS

- Languages: C#, JavaScript/TypeScript, SQL, HTML/CSS
- Frameworks: React, Next.js, React Native, .NET, Express.js
- Tools: Git, Firebase, PostgreSQL, MongoDB, Vercel
- Platforms: Windows, Android

ADDITIONAL INFORMATION

- Languages: English(B2, YDS:70, iTEP Academic-Plus:4.1), Turkish(Native)
- Additional Experience: Game development with Unity (beginner level)
